

### Geography - Water

This unit will introduce the water cycle and allow us to explore the processes of evaporation and condensation through a range of practical activities.

By the end of the unit most children should be able to:

- Describe water in its solid, liquid and gaseous state.
- List the main events in the water cycle.
- Explain that changes in temperature cause evaporation and condensation.
- Explain that water has to be cleaned for drinking.
- List different types of flooding.
- Describe how flooding affects communities.

### Science : Chemistry

**States of Matter** - We will explore the difference between solids, liquids and gases.

### Literacy

Stories set in imaginary worlds

Poetry

Letter writing

GPS (Grammar, Punctuation & Spelling)

## Class Three Overview Autumn

### The Wonderful Wolves

# Do we drink toilet water?

### Maths

Place value

Formal addition and subtraction

Timetables

### Art

Exploring the work of Monet

Not taught this half term

History

MFL DT

### PE

Hockey (Monday)

Swimming (Wednesday)

### Music

Recorders

### RE

What does it mean to be a Buddhist?
